Job Title: Full Stack Developer

Company: NextGen Innovations

Location: Seattle, WA, USA

About Us:

NextGen Innovations is a leading technology firm based in Seattle, known for its pioneering software solutions that transform businesses globally. We specialize in developing integrated software that addresses complex business challenges, delivering both front-end and back-end solutions to enhance user experiences and operational efficiency. Our multidisciplinary teams are composed of some of the brightest minds in software development, UX/UI design, and more, driven by a commitment to innovation and excellence.

Job Description:

We are seeking a Full Stack Developer to join our vibrant team. This role involves working across the full technology stack, from front-end web interfaces to back-end servers and everything in between. The successful candidate will be instrumental in building software products that are visually appealing and highly functional, making critical contributions to all phases of the development lifecycle.

Skills:

Design and develop front-end architecture, including transforming UX/UI design into high-functioning code.

Code and debug applications in various software languages.

Integrate user-facing elements with server-side logic and functionality using server-side languages.

Design and implementation of data storage solutions.

Build reusable code and libraries for future use.

Ensure the technical feasibility of UI/UX designs.

Optimize application for maximum speed and scalability.

Maintain, expand, and scale existing software products.

Collaborate with other team members and stakeholders to improve usability.

Stay plugged into emerging technologies/industry trends and apply them into operations and activities.

Requirements:

Bachelor's degree in Computer Science or a related field.

3-5 years of experience as a Full Stack Developer.

Strong understanding of front-end technologies, including HTML5, CSS3, JavaScript, and jQuery.

Proficient experience using back-end programming languages (e.g., Java, Python, Ruby, .NET).

Experience with cloud message APIs and usage of push notifications.

Knowledge of code versioning tools such as Git.

Understanding of server-side CSS preprocessors, such as LESS and SASS.

Familiarity with database technology such as MySQL, Oracle, and MongoDB.

Good understanding of server-side templating languages (e.g., Jade, EJS).

Strong organizational skills to juggle multiple tasks within the constraints of timelines and budgets with business acumen.

Benefits:

Good salary package.

Comprehensive health, dental, and vision insurance.

Flexible working hours and remote work options.

Paid parental leave, vacation, and sick time.

401(k) plan with company match.

Professional development and career growth opportunities.

A modern office environment and a supportive team dedicated to professional excellence and personal growth.
